

Seminar: IESBA Perspectives on Sustainability Ethics and Firm Culture & Governance

Programme code: SCPD25111101

The International Ethics Standards Board for Accountants (IESBA) officially launched its Global Ethics Sustainability Standards on 27 January 2025.

The Global Ethics Sustainability Standards include the International Ethics Standards for Sustainability Assurance (including International Independence Standards) (IESSA) and the revisions to the International Code of Ethics for Professional Accountants (including International Independence Standards) (the IESBA Code) related to sustainability reporting and the use of the work of an external expert.

IESSA and the revisions to the IESBA Code address critical risks to the integrity, quality and effectiveness of sustainability reporting and assurance, such as bias, conflicts of interest, pressure to act unethically, fraud, including greenwashing, non-compliance with laws and regulations, and threats to the independence of the assurance practitioners.

These landmark new standards provide a robust ethical framework for reporting and assuring sustainability-related information that promotes high-quality, reliable information for decision-making by investors, lenders, customers, suppliers, government, regulators and other stakeholders.

The Firm Culture and Governance Project aims to develop a culture and governance framework that promotes, supports and reinforces a high standard of ethical behavior by a firm's leadership, other partners, and staff across all of the firm's services, thereby helping the firm develop a reputation as a highly ethical firm, mitigate the risks of unethical behavior and strengthen public trust and confidence in all of its services. At its June meeting, the IESBA approved updates to its 2025-2026 Work Plan to better support ethical behavior and independent judgment in an increasingly volatile and uncertain environment. In this seminar, the speaker will delve into:

- Background to the development of ethics and independence standards for sustainability
- Key requirements of the ethics standards for sustainability reporting and assurance standards, and the use of external experts
- The impetus for the Firm Culture and Governance project, the key findings of the FCG Working Group and the current status of the project
