- The macroeconomic shift towards **stablecoin** settlements in cross-border trade.
- The evolving audit requirements for **stablecoin** reserves under the latest regulatory frameworks.
- How enterprises can utilize "AppChain" technologies to embrace Web3 efficiency without compromising commercial data privacy.

Speaker

Mr. Arion Ho
Founder, ENI Network

Mr. Ho is a visionary executive with over two decades of leadership experience across Tier-1 financial institutions (HKEX, UBS, Standard Chartered) and the regulated digital asset sector (OSL, Zodia Markets). He combines deep regulatory expertise with cutting-edge technological innovation to build the next generation of financial infrastructure.

As the Founder of ENI Network, Mr. Ho is architecting a one billion-valued, enterprise-grade Layer-1 blockchain specifically designed for Real-World Asset (RWA) tokenization and the future machine economy. By pioneering "AppChain" (Application Chain) technology and parallel execution engines, he solves the "commercial trilemma" of scalability, data isolation, and compliance – enabling Fortune 500 enterprises to build highly customized, secure, and fully compliant on-chain environments.

Backed by executive education from the Massachusetts Institute of Technology (MIT) Sloan School of Management, Mr. Ho combines rigorous academic frameworks with extensive cross-border operational leadership. He previously served as the Chief Operating Officer (COO) of a comprehensive financial holding group, overseeing integrated services across securities, asset management, and Web3 technologies.
