

Information, Communications and Technology Interest Group webinar:
Secure AI – Balancing workplace efficiency with governance
 (Programme code: EWEB26081202)

Artificial intelligence (AI) is rapidly transforming daily business operations. While the efficiency gains are undeniable, ensuring robust data protection and balancing governance for both your organizations and clients has become a critical priority.

This session will share practical best practices for leveraging AI tools while maintaining strong governance and compliance. Participants will gain insights into potential risks, including data leakage, bias, and misuse, along with effective mitigation measures. Additionally, the speaker will introduce role-based AI training materials to support staff at different levels in adopting AI responsibly.

The webinar will conclude with a live demonstration of an AI Strategy and Policy Generation Tool, designed to help organizations strengthen oversight while enhancing productivity.
