

IT Conference 2017

Grasping Opportunities in the age of Everything-as-a-Service

What new technologies and business models can Accountants leverage to increase opportunities and reduce costs

About the conference

"Everything-as-a-Service", or "EaaS", is a concept of being able to call up re-usable, fine-grained software components across a network. EaaS is a subset of cloud computing and is becoming an integral part of the fabric of our digital lives. The power of information technology is revolutionizing the business world by making it easier and cheaper than ever to build a startup. We will see momentous new changes and expansive growth in the realm of on-demand services.

Join this year's IT Conference at which the speakers from different background and industries will share with you their insight about emerging business opportunities and reducing costs through new technologies. You will also receive advice and tips on creating an innovative culture, transforming your business and making the best use of new technologies.
