# **Financial Controllership Programme**

## Management Competency Development Module

The first module of the Financial Controllership Programme focuses on the importance of soft skills which has always been highlighted as the differentiator for career development for accountants today. Stepping up to financial controller, CFO and managing director does not only require you to be a better accountant, it also requires you to be able to lead, communicate, influence, negotiate and partner with key stakeholders.

This module will challenge you, help you identify your personal strengths and weaknesses and give you practical steps you can take in your present situation to become a better leader and manager. The module will feature best practices, experience sharing, role play and exercises. Sessions will focus on live issues faced by participants.
