ABOUT THE e-Seminar

Accounts payable is a key area of focus for process improvement for many organizations. Implementing accounts payable automation technology will help organizations to streamline and automate the accounts payable process, eliminate manual tasks, and gain better visibility and control over crucial financial information.

In this e-Seminar, the speaker will share the practical experience of accounts payable automation projects in achieving operational efficiency gains, as well as paper and other cost savings. He will also share some useful tips and lessons learnt on how to manage the key project stakeholders in order to generate a high return on investment in accounts payable automation solutions.
