

## Young Members Virtual Conference: Building an arsenal for young accountants – new trends and skillsets for future-ready CPAs

### [Archived session]

The business environment nowadays comes with its own unique set of challenges. It is becoming increasingly important for future-ready CPAs to showcase additional soft skills apart from the traditional competencies, emphasizing strengths in communication, technology, business intelligence, etc.

What types of skillsets should young CPAs develop to flourish in a world where AI-powered algorithms automate traditional tasks? What are the top skills you have to equip yourself with under the evolving financial markets and the growing emphasis on corporate social responsibility?

The Institute's Young Members Committee organized its annual conference on 6 November, which provided a platform for speakers to share and inspire young CPAs on the new market trend covering subjects relating to AI, big data, cryptocurrencies, security token offerings, listed companies, as well as environmental, social and governance reporting.

Members interested in viewing the archived session of the conference, please refer to the information below for registration.
