Best Corporate Governance and ESG Awards series: Establishing good corporate governance in public sector and not-for-profit organizations

About the topic

Ensuring a good corporate governance framework and practices within public sector and not-for-profit organizations is vital to instil public confidence in the integrity of their operations, safeguard their use and custody of public assets or taxpayers' money, and minimize opportunities for abuse. In this seminar, the speakers will share their observations about a recent high-profile case involving misconduct at a children's charity, and consider how this could have occurred and what should be done to prevent similar cases from happening in future. They will outline some essential governance practices that should be implemented in all public sector organizations.
