

HKICPA x HKIE: Joint webinar on ESG for young accountants and young engineers

Set against the backdrop of the global pandemic, environmental, social and governance (ESG) has emerged as a hot topic as organizations and governments alike focus on a green recovery. The rise of ESG has brought non-financial reporting into the forefront of corporate disclosures, influencing business strategy, investment decisions and access to financing. The latest requirements from ESG reporting frameworks have impacted all branches of business, from internal audit to human resources, corporate communications to engineering operations.

The Young Members Committee of the Institute and The Hong Kong Institution of Engineers (HKIE) have jointly invited experts from EY to introduce the big picture driving ESG performance in companies in this webinar. The speakers will also share on how these trends are impacting engineering-related companies, their business direction and daily operations, as well as the role of engineers and accountants in this rapidly growing field.

About the Speakers

Mr. Ivan Tong CPA (practising)

Managing Partner

Climate Change and Sustainability Services, Greater China, EY

Mr. Tong has over 20 years of experience in providing assurance and advisory business services across a wide range of industries including manufacturing, retail and consumer products, aviation, logistics, and securities. His expertise includes low carbon development consulting services, sustainability compliance and audit / assurance services, carbon trading and carbon management consulting services, and ESG report consulting and assurance services to corporations and public agencies. He has a profound knowledge on the specific features, regulations and key risks in the aviation industry and offers unique insight on keeping control over large projects and providing assistance to major transactions. Mr. Tong currently leads the Climate Change & Sustainability Services at Ernst & Young China, delivering over 100 sustainability engagements in EY for Fortune 500 companies, government departments, and listed companies in PRC and Hong Kong.

Mr. Tong holds a number of influential positions in the sustainability sector in China and Hong Kong, including as part of the HKICPA Sustainability and Integrated Reporting Advisory Group, and is now proactively promoting the development of integrated reporting and green finance in the Greater China Region.

Mr. Tong is a fellow of the Chartered Association of Certified Accountants, UK (ACCA) and a member of HKICPA.

Mr. Justin Cheung

Manager

Climate Change and Sustainability Services, EY

Mr. Cheung has over 9 years of experience in sustainability advisory, climate risk and project management. Justin has led and supported strategic advisory services and sustainability readiness assessments for over 25 companies in Hong Kong across a large number of industries including real estate, telecommunications and consumer products, providing recommendations on governance and capacity building, aligning with local and international disclosure frameworks and improving capital market ratings.

Prior to joining EY, Mr. Cheung provided strategic consultancy services in a global engineering consulting firm, involved with the planning, design and construction of mega-infrastructure projects, sustainable urban development, circular economy, smart city development and climate risk assessments, serving the government, public institutions and real estate developers both in Hong Kong and internationally.

Mr. Cheung is a member of The Hong Kong Institute of Engineers (HKIE) and Association for Project Management (APM).
