

T VIRTUAL CONFERENCE 2022

From Masters of Digits to Masters of Digital Transformation -Understanding the use cases, key learnings and necessary technologies to make digital initiatives successful for organizations big and small

About the conference

Digital transformation is a journey with multiple connected intermediary goals. The key to succeeding towards ubiquitous optimization across processes, divisions and the business ecosystem within a hyper-connected age lies with building the right bridges in function of that journey. This includes bridges between the front end and back office, data and decisions, as well as bridges between people, teams, technologies, and more.

With the theme "From Masters of Digits to Masters of Digital Transformation", the conference will discuss use cases, key learnings and necessary technologies to make digital initiatives successful in organizations big or small. A panel of renowned speakers will share their insights on the latest developments of technology in Hong Kong, as well as on future trends, developing a data mindset, experience on AI and Cloud applications in their organizations, and more.

Register for this online conference organized by the Information, Communications and Technology Interest Group to learn more about how to succeed in the new digital era.
