

Information, Communications and Technology Interest Group lunch webinar

The importance of intelligence sharing and raising staff awareness of cybersecurity

(Programme code: EWEB23011301)

In the era of technology, cybersecurity is no longer an option, but an essential element of you and your company. The “human factor” is one of the most common serious risks among cybersecurity threats. According to Verizon's 2022 Data Breaches Investigations Report, 82% of data breaches involved the human factor.

In this webinar, the speaker will talk about the trends of cyber risks in the finance and accounting industry, how to effectively raise staff awareness of cybersecurity, as well as some free resources available to enhance the cybersecurity level of your company.
