

Live webinar: Reviewing valuations in audits

COURSE HIGHLIGHTS:

Reviewing valuations is a frequent issue in audits of financial statements, and is usually challenging because valuations are prepared by management or third-party professionals using significant professional judgement, qualitative inputs and might involve complex models and techniques.

This webinar will give an overview of valuation techniques commonly used for financial reporting purposes. Speakers will discuss procedures auditors can apply when reviewing valuations, with reference to illustrative examples to help you navigate the key principles and obtain sufficient appropriate audit evidence in audits of financial statements. They will also share practical tips and common pitfalls to help you deal with application issues.

This live webinar encourages interactive-learning. A Q&A session will be included during the webinar providing opportunities for participants to explore the topics in more detail and ask questions.
